Your Request

I need a personal portfolio website for my photography business. The site should have:
1) A responsive home page with a gallery showcase, 2) An about page with my bio and equipment list, 3) A services page with pricing packages, 4) A contact form, and 5) Integration with Instagram to automatically display my latest posts. Please create a clean, modern design with a dark theme that makes my photos stand out. Use HTML, CSS, and JavaScript, and make sure it's mobile-friendly.

Example requests: Japan Travel Itinerary Data Analysis Website Creation Research Summary

Execute

Stop

```
class="gallery-grid">\n \n \n \n <!-- Add more images as needed →\n </div>\n </section>\n <section id="instagram-feed">\n <h2>Latest Instagram Posts</h2>\n <div id="instagram-container">\n <!-- Instagram posts will be dynamically loaded here ->\n </div>\n </section>\n </main>\n <footer>\n <p>&copy; 2023 Photography Portfolio. All rights reserved.</p>\n </footer>\n <script src="js/main.js"></script>\n</body>\n</html>", "file_path": "portfolio_website/index.html"}
```

◆ Tool Result: Tool

```
Step 6: {'message': 'Content successfully saved to generated\\html\\index_2html', 'file_path': 'generated\\html\\index_2html', 'mime_type': 'text/html', 'display_in_ui': True, 'file_name': 'index.html'}
```
